

CS 346: Daily Standup

Team #: 204

Date: February 10th, 2023

Questions

Enter comments below. If a team member is absent, fill in their name, and put a line through the answer section.

Name	What have you completed since last meeting?	What are you going to complete today?	What obstacles are in your way?
Avesta	Got started on DB setup and security	Get connected to DB using Hibernate	Hibernate does not have an SQLite dialect, need to implement it on my own. Security is also a bit iffy as Spring deprecated most of their old tooling in release 3.0
York	Got started on persistence abstraction	Finish persistence abstraction	Nothing
Mikail	Deep dive into WebSockets and what Spring can provide	Sync up with Avesta to discuss solutions for whiteboard rooms	Nothing
Edward	Got started on Menu Bar	Continue working on Menu Bar	Nothing

Outstanding

Do we need help with anything?

No help is needed with anything. It was communicated that if this changes we can communicate on discord.

Decisions

Is there anything else we should capture from this meeting?

Are we okay with rolling back Spring to an arbitrary version 2? **YES**

Spring provides STOMP which is a usable abstraction, are we open to using it assuming permission is granted? **YES**
